-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Species Election Requirement

1. This application encompasses four species of the inventive subject matter, as for example, the species of Fig. 1, Fig. 2, Fig. 3, and Fig. 4 respectively. Pursuant to 35 USC §121, applicant is required for a complete response to (1) elect a single disclosed species, i.e., figure, and (2) list all claims readable on the elected species including and any claims subsequently added (MPEP 809.02 (a)).

2. Applicant is further advised that a mere argument alleging that a generic claim exists or is allowable will not satisfy a species election requirement. For a complete response, applicant must elect a single species and list the claims readable on that species as set forth above.

Specification

3. A complete substitute specification followed by the claims is required pursuant to 37 CFR 1.125(a) because it is impossible to figure out what the complete disclosure is. Applicant is suggested to study the US Patent Chamis 6,393,831 a copy of which he received from the USPTO in a previous communication, and to draft the substitute specification in a similar pattern of form and style. The claims in the substitute specification will be numbered 31-48, as per Applicant's communication filed 10/04/2004. The substitute specification will contain the appropriate drawings Figs. 1-4.

A substitute specification must not contain new matter. The substitute specification must be submitted with markings showing all the changes relative to the immediate prior version of the specification of record. The text of any added subject

Art Unit: 3746

matter must be shown by underlining the added text. The text of any deleted matter must be shown by strike-through except that double brackets placed before and after the deleted characters may be used to show deletion of five or fewer consecutive characters. The text of any deleted subject matter must be shown by being placed within double brackets if strike-through cannot be easily perceived. An accompanying clean version (without markings) and a statement that the substitute specification contains no new matter must also be supplied. Numbering the paragraphs of the specification of record is not considered a change that must be shown.

4. The disclosure is objected to because of the following informalities: the newly filed claims 31-48 lack status identifiers, as per 37CFR 121. The rule can be found on the internet at the USPTO site <http://www.uspto.gov/web/offices/pac/mpep/mpep.htm>.

Note that a statement "Claims 1-30 canceled" must come before claim 31, and that each claim must have a status identifier after its number, e.g.,

"31. (new) An internal combustion" etc.

Appropriate correction is required.

5. Applicant is urged to comply with each one of the above requirements in order to permit the prosecution to proceed at an expedited pace and avoid abandonment. The species election must be made in a letter accompanying the substitute specification with the appropriate drawing and the claims. **Note that the substitute specification should not contain any new matter.** It must simply be an ordered and complete presentation of the original application, conforming the form and style requirements as specified in
